

6th day of our travel (aug 18th)

PA0FLE, Monday 20 August 2007 - 22:20:55

Because the weather had calmed down we succeeded to set up the spiderbeam and make many contact on 20 metres. Unfortunately 15 metres is not open so we mainly made contacts on 20 metres, and on 6 metres with jt6m (see log section). The start of the lighthouse activation was succesfull, because this is the first time the utvaer lighthouse is activated.
